

CAST LINK BELT FURNACE SYMPOSIUM | Düsseldorf – Deutschland 2018

Review: The user meeting for cast link belt furnaces

With the Lohmann Conference series, Friedr. Lohmann GmbH has set itself the goal of offering high-quality specialist conferences on specific topics in order to enable maximum knowledge transfer and networking.

The first event was the "Cast link belt furnace symposium" which took place from 12th April 2018 to 13th April 2018 in Düsseldorf. Within two days the professional audience had the opportunity get informed and discuss the latest developments in the field of cast link belt furnaces:

Topics

Main topics were e.g:

- High temperature corrosion
- Furnace engineering design and development
- Manufacturing of cast links and drums
- Maintenance
- Repair and troubleshooting
- Refractories and burner technologies
- Quality control in continuous heat treatment processes
- Economic bulk charging
- Alloy design

The lectures offered the participants a balanced mixture of practical industry lectures and university research reports.

Program committee

The symposium was supported by a neutral, scientific program committee on a voluntary basis. It reviewed the abstracts submitted and accompanied the design of the scientific program. The members of the program committee submitted proposals for the composition of the symposium, supported the organizing committee in structuring the scientific presentations and fine-tuned the program.

The Scientific Program Committee of the Cast Link Belt Furnace Symposium 2018 was represented by:

Dr. Roman Ritzenhoff Leiter
Qualitätsstelle Friedr.
Lohmann GmbH

Harald Berger Ltg.
Marktkommunikation
AICHELIN Group

Prof. Dr.-Ing. Gotthard Wolf
Institutsdirektor Gießerei-
Institut der TU
Bergakademie Freiberg

Uwe Breves
Produktionsleiter Wärme-
und
Oberflächenbehandlung
KAMAX GmbH & Co. KG

Thorsten Kutsch
Geschäftsbereichsleitung
Gießerei Friedr. Lohmann
GmbH

Feedback

Our first symposium was a complete success with more than 50 international participants! We thank all participants, speakers and the program committee for the support, the excellent atmosphere and the positive feedback. We are looking forward to the next symposium!

And that's what the participants said...

"An absolutely successful event with high-quality technical lectures - from practice for practice. Equally interesting for operators, plant constructors and suppliers".

Rainer Braun
Dipl. Ing.
Geschäftsführender Gesellschafter / Managing Partner

BURGDORF GmbH & Co. KG
Birkenwaldstrasse 94
D - 70191 Stuttgart

"The innovative event concept with a sharp focus enabled a fascinating and instructive depth of lectures and discussions. A high degree of professionalism regarding the entire event organization left nothing to be desired".

Gerd Waning
Dipl. Ing.
Marktentwicklung Metallurgie Wärmebehandlung/
Market Development Metallurgy Heat Treatment
